

CHIRAG BENDALE

FLUTTER DEVELOPER

/ ALL ABOUT ME

Am a skilled Mobile App Developer who has around 2 year of experience with Flutter Hybrid Mobile App development. If looking for a highly skilled and rich experienced mobile expert with a deep knowledge, a professional attitude, excellent communication skills and the highest code quality, then I'm the person looking for. I'll be Available upon request.

/ CONTACT DETAILS

A/103 - Siddhi Vinayak Park,
Near Sarojini Naidu Vegetable Market,
Palanpur Jakatnaka,
Adajan, Surat - 395009

/ EDUCATION HISTORY

>> Dr. S. & S.S. Ghandhy College Of Engineering

6.95 / 10 CGPA | 2014 - 2017

> Diploma of Information Technology

>> Birla Vishvakarma Mahavidyalaya Engineering College (BVM)

5.85 / 10 CPI | 2017 - 2021

> Bachelor of Information Technology (B.Tech)

/ COMPETENCIES | SKILLS

- > Firebase, Firestore, Local Storage
- > Flutter, Dart, GetX, BLoC & Cubit
- > Mobile App Development, SDK
- > Experience with version control systems like Git.
- > Google Map, Geolocation, GPS
- > Familiarity with Agile methodologies and project management tools.
- > Proficient in Flutter framework for mobile application development.
- > Excellent problem-solving and communication skills.

/ WORK EXPERIENCE

>> Flutter Developer

VPN INFOTECH | 2024 (April - Present)

- Strong understanding of Dart programming language
- Proficiency in building and customizing Flutter widgets
- Experience with state management solutions (e.g., Provider, BLoC)
- Advanced Smooth Animations: Creating smooth and performant animations
- Flutter Web: Building cross-platform web experiences with Flutter
- 2D Game Development: Utilizing Flutter for building engaging 2D games
- Method Channels: Enabling communication between native platform code (Java/Kotlin, Swift) and Flutter
- Flutter Isolates: Implementing isolates for background processing and improved performance
- Google Gemini AI Model (if applicable): Knowledge of and experience integrating the Google Gemini AI model into Flutter applications (assuming this is relevant to the specific role)

>> Flutter Developer

Letmegrab | 2023 (Sept - March)

- Managed background tasks efficiently with isolates to enhance user experience and optimize resource allocation.
- Incorporated local databases (such as SQLite, Hive) for effective data storage and retrieval in offline situations.
- Deployed robust solutions utilizing dynamic links, Crashlytics, and platform channels (method channels) to ensure a seamless user experience and efficient app monitoring.
- Emphasized code maintainability and scalability through dependency injection using GetIt and a clean architecture approach employing the Bloc pattern for state management.
- Crafted custom UI components with precise control using CustomPainter.
- Improved code reusability and effectiveness by creating custom extension methods for networking, UI construction, and state management.
- Enforced data integrity and offline functionality by implementing strategies for offline data caching and synchronization.
- Emphasized automated testing with industry-standard packages like flutter_test and Mockito to achieve thorough code coverage and early bug identification.

>> Flutter Developer

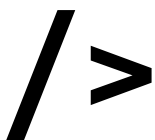

Sourcecube Technologies | 2023 (Feb - Aug)

- Proficiency Across Platforms: Provided responsive UI designs that effortlessly adapt to both Android and iOS devices.
- Mastery of Platform-Specific UI: Developed platform-specific UI elements strategically to ensure an optimal user experience on each platform.
- Integration of Firebase & Google Maps: Successfully incorporated Firebase and Google Maps features to enrich app functionalities.
- Innovative Custom UI Design: Spearheaded custom UI designs utilizing advanced widgets such as CustomScrollView and Sliver widgets.
- Optimization Expert for Performance & UX: Significantly enhanced application performance and user experience through code optimization and UI improvements. (If possible, quantify achievements like "reduced app startup time by 20%")
- Skillful in Internationalization & Localization: Simplified app development for global users by implementing efficient internationalization and localization strategies.
- Leadership in Mentorship & Code Review: Proactively mentored junior developers and led code reviews, promoting a culture of code quality within the team.

>> Flutter Developer

OmTec Web | 2022 (Jan 2022 - Jan 2023)

- Developed and launched diverse Flutter applications spanning Firebase, Photo Editing, Payment Gateway, E-commerce Shopping, and Pet Care domains.
- Specialize in crafting high-quality Flutter and Dart code for iOS and Android platforms, incorporating effective state management patterns like GetX and BLoC.
- Showcased adept Agile project management skills by overseeing Android stories and tasks throughout sprints, ensuring precise and timely status updates for a streamlined development process.

- Efficiently integrated various RESTful APIs and implemented Provider state management to enhance application data handling.
- Collaborated as a team member by proactively creating solutions for common issues and sharing knowledge to support fellow developers and expedite project progress.
- Leveraged the responsive framework capabilities of GetX to develop and optimize applications for a seamless user experience on various devices.
- Committed to continuous enhancement by actively exploring, evaluating, and adopting new technologies to boost development efficiency.

>> Flutter Developer (Internship (Developer))

Logistreak Solutions | 2021 (Aug - Dec)

- Built and designed custom Flutter applications from scratch.
- Applied Material Design principles for a visually appealing and user-friendly experience.
- Effectively utilized various Flutter widgets to create interactive and dynamic UI elements.
- Implemented state management patterns (consider mentioning the specific pattern used, e.g., Provider) to maintain application state.
- Integrated with APIs to fetch and manage data within the app.
